Stay Sharp

When JBF was founded in the small Danish town of Løgstør in 1930, it was with the aim of ensuring Danish users a decent shave thanks to super-sharp, double edge razor blades. The small factory prided itself on its outstanding craftsmanship and refused to compromise. This was a quality and sharpness you could count on – every time.

It still is, but it is no longer during their morning shave that customers are enjoying the sharpness of JBF. When traditional razors went out of fashion in the 1960s, the production of razor blades ceased, with the attention instead turning to the production of blades for a variety of other purposes, including industrial use. Experience spanning more than 90 years in the production of thin metal blades is the cornerstone of the sharpness and quality that has made JBF a world leader in professional, high-quality glass scrapers.

The secret lies in the sharpness of the blades; the thin, uniform quality and the special focus on usability. No other scraper brands make their own blades, and JBF remains the only blade manufacturer to specialise in scrapers and the blades that go with them. Whereas other suppliers have their blades made by blade manufacturers focused on cutting performance, JBF has, in close dialogue with end users and retailers, developed

blades that are perfect for scraping. These are combined with a specially designed ergonomic plastic handle, developed by trusted suppliers according to our strict instructions, to ensure a unique, high-quality tool that makes everyday life easier, more efficient and safer for professional users. Our tools make them razor-sharp at their work, leaving them with a feeling of triumph, so to speak, each time they overcome the scraping challenge they are faced with – hence the name Triumph.

Triumph glass scrapers are used in the cleaning, window cleaning, painting & decorating and aquatics segments. Widely recognised for their high quality, safety, functionality and broad range of uses, all Triumph scrapers are “Manufactured by JBF”. They have evolved over the years to reflect changing times and new demands and needs, but the keen sense of quality, the values and the respect for the old virtues continue to manifest themselves in each and every blade that leaves the factory.

Stay Sharp

Triumph® Scrapers
Product Range

Quality. Function. Safety. + Series.

The world is constantly changing, as are the demands and challenges you face as a professional. This has been taken into account when you choose a Triumph scraper. We help you comply with both your own demands and legal requirements in respect of performance, ergonomics and safety to ensure that you are always sharp and competitive.

Our new generation of scrapers, Triumph+, is the effective scraper you know – just even better. It was important for us to preserve all that is good about Triumph scrapers, and then improve on it where possible. Triumph+ is even more ergonomic, even safer and even more efficient – but not at the expense of the things that have made the original Triumph scraper the favourite of so many professionals.

"I have used Triumph scrapers every day for more than 13 years, and I love them. It's simple and easy to change blades and set it on an extension pole."

John Christensen

MK2 +Series

**Triumph® MK2 Straight was launched
in 1981. It quickly set a new standard
for professional scrapers and has
been popular ever since.**

Triumph® MK2 is moulded out of one piece of reinforced plastic for extra durability. The scraper continues to be the tradesman's preferred tool due to its simplicity, low weight, high quality and, of course, the 150 mm-wide head. The scraper comes fitted with a 0.20 mm carbon blade and safety cap with or without rubber squeegee.

Flexible

Easily attach the handle to all standard cones from different manufacturers.

Ergonomic

Handle shaped for the human hand. Rounded corners and anti-slip ribs provide a secure hold and a firm grip.

Easy

Illustrative arrows show how to easily change the blade and remove the protective cap.

Sharp

Reinforced channel holds the sharp double edge blade. Improved trigger tab on blade holder with rounded corners.

Safe

Safety cap with newly developed and improved locking mechanism; supported by locking marks and a clear click sound.

Triumph+ MK2 Straight

Launched in 1981, the Triumph+ MK2 quickly set a new standard for professional scrapers and has remained popular ever since. The Triumph+ MK2 is made as a single reinforced plastic casting for excellent durability. It has a 150 mm scraper head to make quick work of any scraping task.

The Triumph+ MK2 is still a favourite amongst professional window cleaners for its simplicity, lightness, durability and quality, as well as the 150 mm width that makes even large scraping jobs go quickly. The scraper comes with a carbon steel blade insert as standard, along with a safety cap with or without a rubber squeegee insert.

**The 150 mm width
reduces scraping time,
even with large jobs.**

**Triumph+ MK2 Straight
without rubber squeegee**

**Triumph+ MK2 Straight
with rubber squeegee**

Triumph+ MK2 Angled

The angled version of the Triumph+ MK2 has the head tilted forward 30°. This allows extra force to be applied on stubborn deposits and makes it easy to obtain the correct angle between the window and the scraper when it is used on an extension pole.

The scraper comes with a carbon steel blade insert as standard, along with a safety cap without a rubber squeegee insert.

The 30° angle makes it easy to handle.

**Triumph+ MK2 Angled
without rubber squeegee**

Aqua Triumph+ MK2 Straight

Trusted by window professionals all over the world, the original Triumph scraper is renowned for its superior quality and scraping ability. With its 150 mm width, the scraper is ideal for cleaning large aquariums with minimum effort.

With protective safety cap, 140x0.15 mm stainless steel blade and rubber squeegee insert as standard.

Aqua Triumph+ MK2 Straight with rubber squeegee

Aqua Triumph+ MK2 Angled

Similar to the Straight version, the Aqua Triumph+ MK2 Angled has the scraper head tilted forward 30°. This makes it easy to angle the scraper correctly inside of the aquarium and simplifies use on an extension pole. With protective safety cap, 140x0.15 mm stainless steel blade and rubber squeegee insert as standard.

The 30° angle makes it easy to handle.

Aqua Triumph+ MK2 Angled with rubber squeegee

The Aqua Triumph scraper is a 150 mm scraper fitted with a 140mm stainless steel blade. The blade is 10 mm shorter than the scraper head to help avoid damaging the silicone seal in the corners of the aquarium.

MK3 +Series

The Triumph® MK3 has inherited all the qualities and durability of the Triumph® MK2, but now also has a slimmer and an ergonomic rubber handle with slip-resistant grooves.

The handle on the Triumph® MK3 provides a comfortable and secure grip, which makes the scraper well-suited to prolonged use. With a width of 150 mm, the scraper can complete even large scraping tasks quickly. The scraper is supplied with safety cap and fitted with a 0.20 mm carbon blade. The scraper is supplied with or without a rubber edge.

Flexible

Easily attach the handle to all standard cones from different manufacturers.

Ergonomic

Handle shaped for the human hand. Soft and chemical resistant materials give a smoother working experience.

Easy

Illustrative arrows show how to easily change the blade and remove the protective cap.

Comfortable

Improved rounded corners and anti-slip ribs make your grip secure and firm.

Safe

Safety cap with newly developed and improved locking mechanism; supported by locking marks and a clear click sound.

Sharp

Reinforced channel holds the sharp double edge blade. Improved trigger tab on blade holder with rounded corners.

Triumph+ MK3 Straight

The MK3 is the latest version of the industry leading Triumph series, developed in close cooperation with window professionals. Inheriting all the features and durability of the Triumph+ MK2, the Triumph+ MK3 additionally features an ergonomic rubber handle with non-slip ribs. This provides a more comfortable and secure grip on the scraper, making it well suited for prolonged use. The 150 mm width reduces scraping time, even with large jobs.

The scraper comes with a carbon steel blade insert as standard, along with a safety cap with or without a rubber squeegee insert.

Triumph+ MK3 Straight
without rubber squeegee

Triumph+ MK3 Straight
with rubber squeegee

“With the Triumph MK3 Angled it takes me only half as long to remove film and lettering from windows. It is highly effective, and with the 0.20 mm stainless steel blade insert I have a really good tool.”

Bechmann Signs
Denmark

Triumph+ MK3 Angled

The angled version of the Triumph+ MK3 has the head tilted forward 30°. This makes it easy to apply extra force to the scraper blade, and the ergonomic rubber handle ensures a firm, comfortable grip. All this makes the MK3 Angled the ideal tool for removing stubborn dirt or window films, even from hard-to-reach windows and glazing.

The scraper comes with a carbon steel blade insert as standard, along with a safety cap without a rubber squeegee insert.

The 30° angle makes it easy to handle.

**Triumph+ MK3 Angled
without rubber squeegee**

**Triumph+ MK3 Angled
with rubber squeegee**

The Aqua Triumph+ also comes with a rubber squeegee insert, making it ideal for cleaning the outside of aquariums. The handle of the Aqua Triumph+ has a keyhole for easy attachment to an extension pole if you need more reach.

Aqua Triumph+ MK3 Angled

All the features of the Aqua Triumph+ MK3 Straight, but with the head tilted forward 30°. This scraper has an ergonomic rubber handle, making it a pleasure to hold even when wet. This makes it easy to angle the scraper correctly inside of the tank and simplifies use on an extension pole. All this combines to make it the ultimate aquarium scraper in our opinion.

With protective safety cap and 140x0.15 mm stainless steel blade and rubber squeegee insert as standard.

The 30° angle makes it easy to handle.

The ergonomic rubber handle, making it a pleasure to hold even when wet.

Aqua Triumph+ MK3 Angled with rubber squeegee

All Triumph blades are manufactured at our own factory in Denmark under strict quality control. We use only high quality steel exclusively from European suppliers to ensure top quality products. Over the last 50 years we have acquired extensive expertise in making the best possible blades for scrapers.

We are the only blade manufacturer specifically dedicated to making scraper blades.

Our many years of experience enable us to make the best blades in the industry, and our skilled craftsmen take great pride in this. All Triumph blades are razor sharp on both edges, making them very economical in use. Just reverse the blade and you have a new scraping edge ready for use.

The Triumph stamps on the blades indicate length, thickness and material.

Handy+

The Handy series is a low-cost option for light, occasional use. The 80 mm head is ideal for removing paint spots, small stickers and tape from windows.

The Handy series features traditional JBF quality, making it the best small scraper available and ideal for professionals, hobbyists and painters.

Ergonomic

The handle is shaped for the human hand and its low weight makes your job easy and fast.

Recycled

With the environment in mind, we now manufacture the Handy from recycled plastic.

Two sided

The handle is designed to be flipped and have a secure grip on either side.

Flexible

Widened hole on the handle makes it easier to mount the scraper on wires and hooks.

Safe

Handy scrapers comes with a safety cover that protects you when the scraper is not in use. The new design makes it even easier to snap on the safety cover from both sides.

Hassle-free

The foldable blade holder covers the whole length of the blade and is symmetrical. This lets you insert the blade from both sides with ease.

Handy+ Straight

The Handy series is a low-cost option for light, occasional use. The 80mm head is ideal for removing paint spots, small stickers and tape from windows. The Handy series features traditional JBF quality, making it the best small scraper available and ideal for professionals, hobbyists and painters.

Handy MK2
Straight

Handy Angled

This angled version of the Handy has the head tilted forward 15°. The tilt provides a better working angle and makes it easier to position the scraper correctly on the glass.

**Handy MK2
Angled**

Handy 300

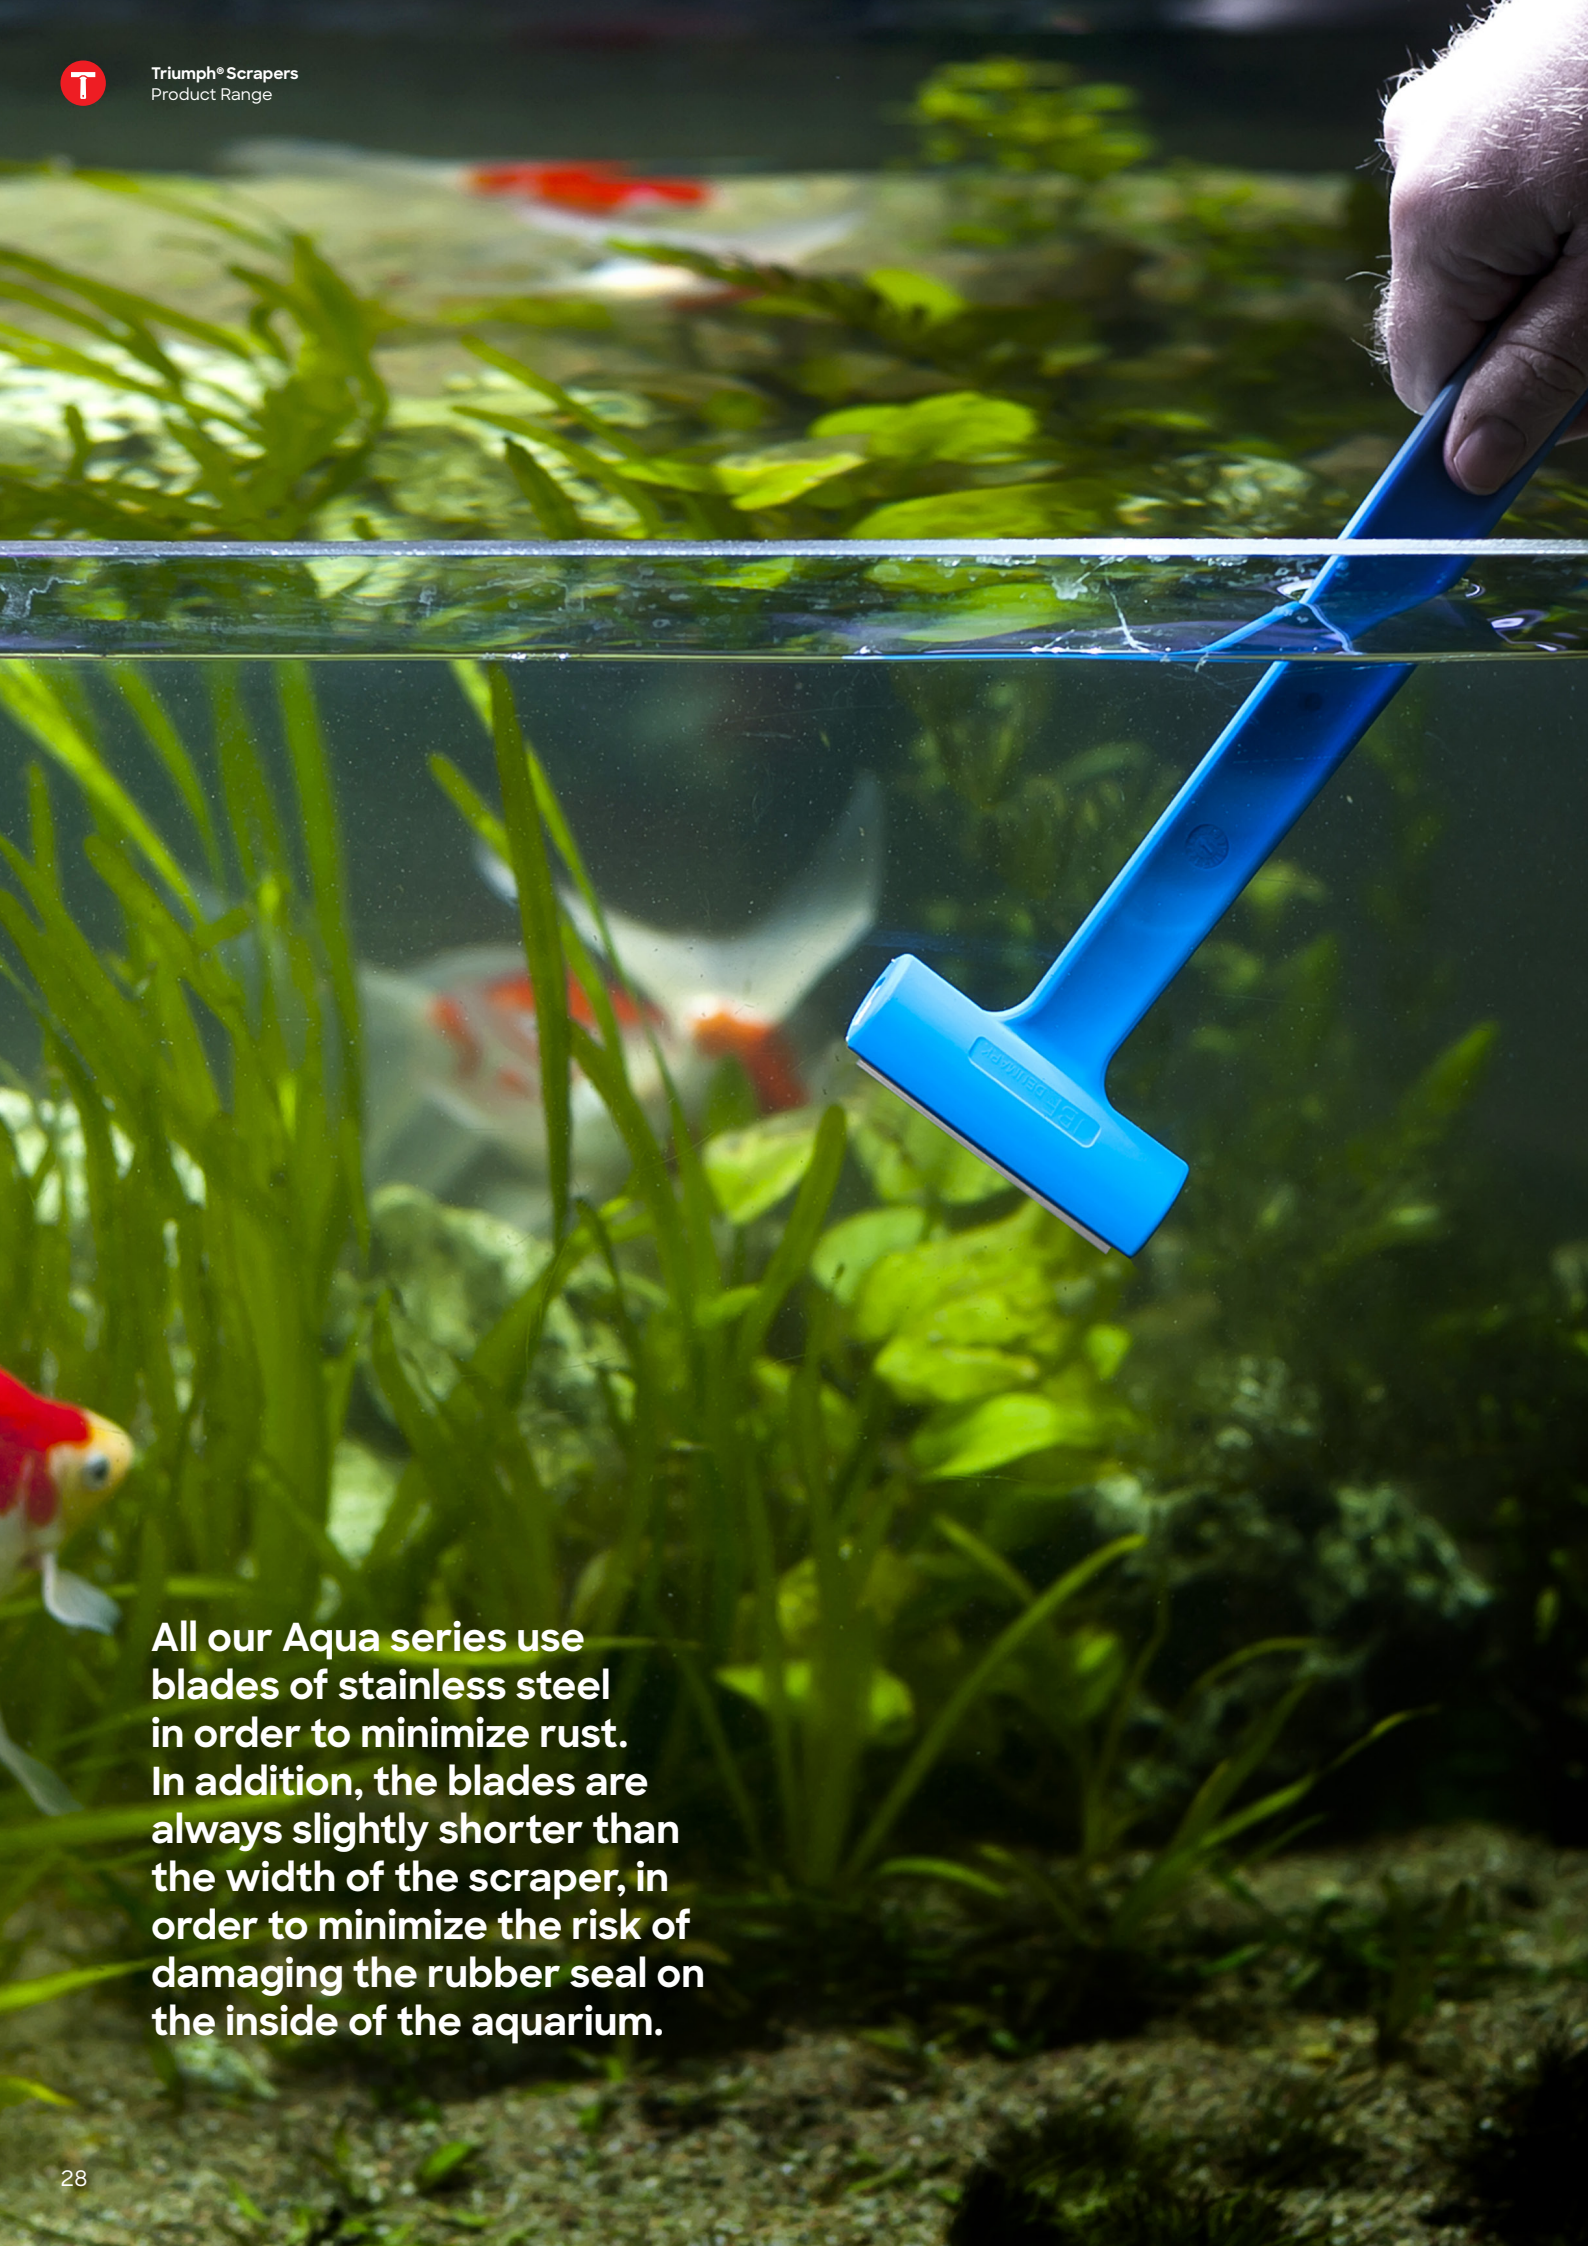

Designed for reach, the Handy 300 provides extended range with its 300 mm handle – perfect for reaching the top of a window. The 15° forward head tilt ensures a good working angle.

Handy 300

All our Aqua series use blades of stainless steel in order to minimize rust. In addition, the blades are always slightly shorter than the width of the scraper, in order to minimize the risk of damaging the rubber seal on the inside of the aquarium.

Aqua Handy+ Straight

Supplied with a quality JBF blade, the Handy scraper makes quick work of removing algae and other deposits inside of any aquarium. This is a great choice for any aquarium hobbyist looking for a small and effective tool for removing algae.

**Aqua Handy+
Straight**

Aqua Handy Angled

Similar to the Handy Straight, but with the head tilted forward 15°. This makes it easy to angle the scraper correctly on the glass and provides a more comfortable working position.

**Aqua Handy MK2
Angled**

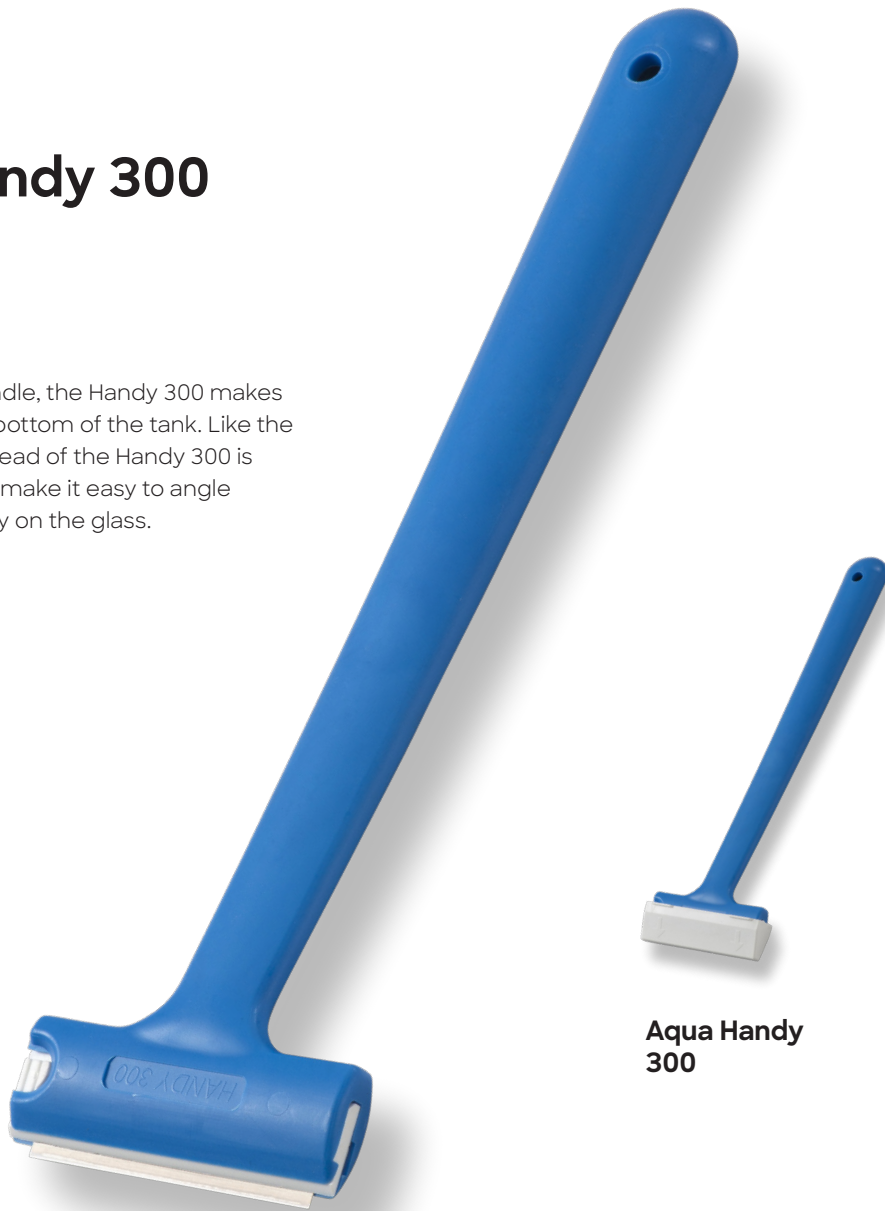

Aqua Handy 300

With its 300 mm handle, the Handy 300 makes it easy to reach the bottom of the tank. Like the Handy Angled, the head of the Handy 300 is tilted forward 15° to make it easy to angle the scraper correctly on the glass.

Triumph 2000

The Triumph 2000 has the safety cap built into the scraper head. The safety cap can easily be operated with just one hand. With all parts integrated and one-handed operation, the Triumph 2000 is ideally suited for working at height. The scraper is supplied with a 149 mm carbon steel blade insert as standard.

Triumph
2000

Triumph Heavy Duty

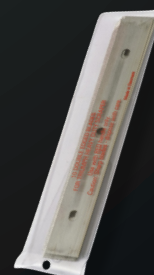

A heavy duty version of the original Triumph+ MK2 scraper, designed to use stronger and thicker 0.30 mm carbon steel blades. This makes the scraper ideal for cleaning terrazzo and other smooth stone flooring. The scraper is supplied with a 0.30 mm heavy duty carbon steel blade insert and a protective safety cap without rubber squeegee.

Champion

With a width of 125 mm, the Champion is an elegant and highly popular window scraper with the angle between the blade and the glass reduced to a minimum. It is used by professionals as well as DIY enthusiasts.

Champion blades are made to the renowned JBF standard of quality. All Champion blades are supplied in JBF dispensers for easy use and safe disposal of used blades.

Champion

We
make
you
sharp

JBF's mission is to make everyday life easier, more satisfying and safer for the professionals who depend on our scrapers, but it should also be easy for you as a retailer. That is why we offer a number of services:

Hanging display cards in 5 languages

Hanging display cards for a wide range of standard products are available in Danish, English, French, German and Finnish. The cards have an open tab for easy hanging of the scrapers on racks in the store. On the back, there are descriptions of the various types of TRIUMPH scrapers and their use. The open tab is labelled with EAN numbers.

Customized hanging display cards

The individual hanging display cards can be customized to match the rest of your product line. The price depends on the shape, colour and quantity.

Customized boxes for packaging

As with the hanging display cards, it is possible to customize the current boxes to match the rest of your product line. Here, too, the price depends on size, colour and quantity.

Customized packaging

We offer customized packaging defined by the customer in the case of large orders. This makes it possible, for example, to get extra packaging in smaller boxes to facilitate picking from the warehouse.

Large quantities and framework agreements are a condition of this.

EAN/UPC

Production and attachment of EAN labels. Customized EAN labels can be attached where requirements regarding shape and quantity are met.

Freight

JBF is happy to help obtain freight quotes and assist with other matters relating to freight handling.

Discount structure

Depending on quantity and order size.

Triumph stand solution

If you wish to boost visibility in-store, it is possible to enter into an agreement for a Triumph stand solution.

JBF co-branding

JBF logos, product images and copy are available for use.

Private label and own plastic colour

There will be private label options on selected products. In some cases, it will also be possible to choose your own colour of plastic.

Industrial blades

With more than 90 years of experience in production of razor blades and industrial blades, JBF A/S offers a huge range of industrial blades. JBF industrial blades have a multitude of uses in such fields as plastics, packing materials, adhesive tapes, leather, porcelain, furs, textiles, brushes, the food industry, decorating, pharmaceutical purposes, the graphic crafts, glazing – and D.I.Y. of course. JBF A/S is approved by The Danish Veterinary and Food Administration to produce industrial blades that have contact with food.

Manufactured from top quality European carbon steel or stainless steel and perfectly honed for lasting sharpness, JBF industrial blades are a durable, accurate, high quality product that will ensure effectiveness in your production.

JBF offers to customize your blade with your company name or other information. Order your JBF industrial blades with lacquer if you want a blade that is more resistant to rust.

JBF also produces a range of customized, special blades developed in cooperation with our customers. If you cannot find your desired industrial blade in the above, please contact us for a customized production that will fit your exact needs.

	320-ANG-70-1	Aqua Handy Angled scraper, carton	Scraper	200
Aqua Handy 300				
	H300-70-0	Aqua HANDY 300 scraper	Scraper	75
	H300-70-1	Aqua HANDY 300 scraper, carton	Scraper	75
Aqua Handy Blade				
	321-70-0,15-R-5-0	Aqua HANDY blade, 0.15 mm stainless steel, 5 bl./disp.	Dispenser	150
	321-70-0,15-R-10-0	Aqua HANDY blade, 0.15 mm stainless steel, 10 bl./disp.	Dispenser	150
	321-70-0,15-R-5-1	Aqua HANDY blade, 0.15 mm stainless steel, 5 bl./disp, carton, 5 cases	Dispenser	150
Aqua Triumph MK2 Straight				
	310-MK2-STR-140-MG-0	Aqua TRIUMPH MK2 Straight scraper	Scraper	75
	310-MK2-STR-140-MG-1	Aqua TRIUMPH MK2 Straight scraper, carton	Scraper	50
Aqua Triumph MK2 Angled				
	310-MK2-ANG-140-MG-0	Aqua TRIUMPH MK2 Angled scraper	Scraper	75
Aqua Triumph MK3 Angled				
	310-MK3-ANG-140-MG-0	Aqua TRIUMPH MK3 Angled scraper with rubber squeegee	Scraper	50
	310-MK3-ANG-140-MG-1	Aqua TRIUMPH MK3 Angled scraper with rubber squeegee, carton	Scraper	50
Aqua Triumph MK3 Blade				
	311-140-0,15-R-5-0X	Aqua TRIUMPH blade, 5 bl./security dispenser	Dispenser	100
	311-140-0,15-R-10-0X	Aqua TRIUMPH blade, 10 bl./security dispenser	Dispenser	100
	311-140-0,15-R-5-1	Aqua TRIUMPH blade, 0.15 mm stainless steel, 5 bl./disp. standard carton, 5 cases	Dispenser	45
100 mm Blades				
	321-100-0,20-C-25-OY	100 mm blade, 0.20 mm carbon steel, 25 bl./disp.	Dispenser	100
	321-100-0,20-C-25-0X	100 mm blade, 0.20 mm carbon steel, 25 bl./disp.	Dispenser	150

JBF Art. no.	Product description		Unit	Standard carton
Champion				
	350-125-0	CHAMPION scraper	Scraper	75
	350-125-1	CHAMPION scraper, carton	Scraper	50
Champion blade				
	351-125-0.20-C-25-0	CHAMPION blade, 0.20 mm carbon steel, 25 bl./disp.	Dispenser	100
	351-125-0.15-R-25-0	CHAMPION blade, 0.15 mm stainless steel, 25 bl./disp	Dispenser	100
	351-125-0,15-R-25-1	CHAMPION blade, 0,15mm stainless steel, 25 bl./disp, carton, 5 cases	Dispenser	45
Click II				
	340-0X	CLICK II scraper, without blade	Scraper	200
	340-B	CLICK II scraper, without blade	Scraper	200
	340-B-BB	CLICK II scraper, with blade, packed in bli-box	Scraper	200
Click Plast				
	340-PLAST	Plast CLICK scraper, with blade, packed in plastic bag	Scraper	240
Click II blade				
	341-2	SINGLE EDGE blade, 5 bl./dispenser	Dispenser	1000
	341-10	SINGLE EDGE blade, 10 bl./dispenser	Dispenser	320
	341-3	SINGLE EDGE blade, 100 bl./case	Case	50

How to guide

Scraping tips

- Always scrape on wet glass, preferably using soap for better glide.
- Scrape at an angle of 30-45° to the glass.
- Do not use chipped or rusted blades. Replace the blade if it looks worn or damaged.
- The blades are extremely sharp, so use caution when handling scrapers and scraper blades.
- Approach edges slowly to avoid cutting mastic or damaging frames.
- The scraper will remove window film. To keep the film intact, avoid scraping on window film.

How to use dispensers

- Break off the safety tab before first use.
- Slide a blade out – The dispenser safely extends one blade at a time.
- Pull the blade out.
- Deposit used blades in the slot on the back of the dispenser, to ensure that no sharp blades are left lying around.

Changing blades

1. Press the small safety lock and push it in.
2. Pull out the blade holder from the opposite side.
3. Carefully reverse or replace the blade with the holes aligned to the pins.
4. Push the blade holder back in.
